LETTER FROM THE HEAD OF PROGRAMME

Dear Doctoral Student

Welcome to your new Doctoral programme at the British University in Dubai. We are very happy to have you join the programme and start your journey with us towards the highest academic qualification. We pride ourselves on being able to offer a high-quality and flexible approach to postgraduate education. We look forward to getting to know you and advising and assisting you until you graduate and receive your PhD Degree. Our aim is to keep you moving in the right direction so you will achieve your goal in a timely manner.

A PhD degree in Business Law from the British University in Dubai will give you a deep knowledge in your chosen area of research and position you for new opportunities in academia or higher management. You will learn a broad spectrum of competencies in conducting rigorous and worthwhile research and how to apply the results of your endeavours in a myriad of contexts within the UAE, the Gulf region and more broadly at the international level.

Your academic supervisors come with a wide range of experience and specialisms – you can focus your research in a particular industry or sector and in areas as diverse as legal aspects of business, international trade, investment, finance, intellectual property and dispute resolution.

As well as three modules on research methods and four core modules, you will engage in a major doctoral-level research project of your own choosing – with guidance from your Director of Studies. In addition, scholarly workshops are offered throughout the year and all students are expected to benefit from these. A further requirement for all students is to develop publications of their work with members of their supervisory team, leading to joint papers in high calibre academic journals and presentations at international conferences.

In these first days and weeks, enjoy your initial steps into this new world, get to know your fellow PhD scholars, your supervisors and module tutors, the administration staff and library staff – and, in our organisation culture, you are sure to have frequent opportunities to meet senior staff of the University.

Finally, remember your continuing education is only part of a balanced life. Please get to know your Director of Studies and feel free to chat with them about getting the work-study-life balance right for your own wellbeing, especially when your personal circumstances change. You cannot rush a PhD!

Have a great PhD experience!

Best wishes

Professor Aymen Masadeh
Head of Programme – PhD Business Law

1. This document

This Programme Handbook is your guide to the PhD in Business Law at the British University in Dubai. It may be updated and revised from time to time. You will be informed of any changes or updates to this document by the Faculty Administrator. Please keep any and all such updates and revisions with your Programme Handbook. You may request the current version of this document at any time from the Faculty Administrator. In case of an appeal the current version of the handbook at the time the appeal is made shall apply. This Handbook should also be read in conjunction with the current BUiD Policies and Regulations – maintained by the Office of Quality and Institutional Effectiveness.

2. Welcome to the Faculty of Business and Law

Welcome to the Doctor of Philosophy (PhD) programme in Business Law offered by the Faculty of Business and Law at the British University in Dubai. This section will briefly explain what the aims of the British University in Dubai are and the way that the PhD programme fits in with these aims.

Broadly, the British University in Dubai aims to run high-quality research-based masters and doctoral programmes, serving the entire United Arab Emirates. This is done in cooperation with leading universities in the UK. The Faculty of Business and Law programmes have been accredited by the Ministry of Higher Education and Scientific Research (MOHESR) in the UAE to ensure that the qualification is recognised in all UAE Emirates and the GCC countries.

This PhD degree offered by the Faculty of Business and Law is designed to meet the needs and interests of aspiring researchers, academics and professionals working within a law related environment in any sector. This may be in public or private sector organisations of any size.

3. University Mission

The Mission of the British University in Dubai (BUID) is to provide world class scholarship, education and research that make a distinctive British contribution to supporting the aspirations of the Dubai Government to become a hub for education and research in the region.

4. University Goals and Objectives

The goals of the University are to:

- Make a distinctive British contribution to the higher educational system in the United Arab Emirates (UAE) through the creation of a high quality research-led university
- Develop leading-edge research capabilities in key disciplines
- Offer the highest international competitive level of research-informed education in key modern disciplines
- Interact with regional industry and play a leading role in stimulating a knowledge-based economy in Dubai and the Emirates
- Provide opportunities for study and research for the purpose of gaining degrees in arts and sciences
- Apply the systems of study and research that are used in distinguished British universities with the aim of enhancing the standard of university education in the UAE
- Qualify and educate nationals who are scientifically and practically trained in all fields of knowledge, through advanced educational and training programmes
- Serve the various sectors of society, especially the commercial and industrial sectors, by providing consultation, technical services and research in the various fields of science and technology and the other disciplines, which will be offered by BUiD
- Consolidate educational, scientific and cultural links with distinguished British universities and institutions, and with other internationally distinguished universities.

5. The PhD programme goals

In pursuance of BUiD's goals this PhD programme is designed to:

1. Make a distinctive contribution to the higher education system in the United Arab Emirates through the creation of a doctoral level programme of equivalent standard to that run in the UK.
2. Develop leading-edge research capability in business law through the training of doctoral level students who will carry out research in the region.
3. Support the Higher Education institutions in the region by training students at the doctoral level to teach in such institutions in the business law discipline.
4. Support other research-led organisations and institutions by building their capacity to carry out distinctive research into business law in the region in order to provide sound policies based on research.
5. Become a centre of excellence for research and the training of researchers in business law within the wider Gulf and Middle East (ME) region.

- 5.1 What this means for you? It means that:
- Your degree will make a distinctive contribution to the higher education system in the United Arab Emirates and the region.
 - The modules are of the same standard as those in the UK. The curriculum is of the same standard in every respect as the UK degree although there will be opportunity to focus on issues of the region rather than the UK in addition to providing a foundation in Western theory and research literature.
 - Faculty members are of equivalent standard to those who work in the UK.
 - The thesis proposal and thesis portion of your work will also benefit from advisors from the UK to provide support and advice to ensure that your research is progressing well.
 - The quality of your work and the grades awarded will be moderated by an External Examiner to ensure that your degree awarded is of the same quality as those awarded in the UK.

The guiding principles for a PhD programme are:

- A focus on the use of theories and research literature to critically examine, interpret and understand practice in the field.
- A focus on producing original research in theoretical and/or empirical form that will contribute to the development of knowledge and understanding within the field.
- In some modules there will be colleagues from other faculties allowing for a cross-fertilisation of ideas to create an active research environment.
- Two thirds of the work on the degree is devoted to conducting a major study, your thesis, which gives you the opportunity to develop leading-edge research in an area of relevance to your chosen field and context.
- The emphasis in grading is not on the repetition and presentation of knowledge but on analytical and critical thinking about module subjects and selected topics for assignments and the thesis.

Overall, the degree aims to provide resources and space for you to grow intellectually and to be able to carry out research in a business law related area, which is crucial for continued economic prosperity in the region and for your own academic and professional growth. Most sessions will consist of discussions and debate, often based on background readings to complement lecture sessions in modules. These sessions will stimulate ideas and are where the excitement and fun of doing the degree are located. Although the degree will involve hard work, the reward, satisfaction and enjoyment of taking part in intellectual debate is, in the end, the major reward for studying for the degree. The quality of what you get from the degree is directly related to the work you put in. The degree is for your growth: take the opportunity and we assure you that you will benefit from and enjoy your study to the full.

Once again, welcome to an exciting learning experience.

6. Programme Structure and Duration

The programme consists of 7 taught modules constituting 180 credit hours plus a thesis of 360 credit hours producing a total of 540 credit hours. Detailed Module Descriptors can be found on the University's blackboard system after you have registered.

Module Descriptions and Syllabi

Core Research Modules (Mandatory - All to be taken)

<p>RES604 Qualitative Research Methods and Paradigms (30 Credits)</p>	<p>This module covers the underlying theory and forms of qualitative research approaches, methods and ethics as they apply to the context of the programme. It develops acquisition of a critical and interpretive understanding of qualitative research approaches, theories and concepts, as well as methods and techniques that constitute the qualitative research realm. This incorporates an introduction to epistemology, ontology, and research ethics. The module will also cover the distinctions between qualitative and quantitative research and the role of mixed methods. The emphasis in this module will be on an understanding of and rationale for adopting qualitative research, as well as controversies and debates about qualitative forms, the role of the researcher, the rights of the research subject, cultural and social norms, and research practices.</p>
<p>RES607 Legal Research Methods (30 Credits)</p>	<p>This module is designed to enhance the students' ability to conduct doctrinal and empirical legal research. It helps students to identify and analyse relevant legal sources and to develop writing and methodological skills. It covers a wide range of legal methods, including doctrinal studies, empirical studies & comparative studies. It trains students on arguing cases, examining legal texts and categorizing their research.</p>
<p>RES606 Research Methodology 3: Research Design and Plan Development (40 Credits)</p>	<p>This module concentrates on the development and design of the students' own research proposals, consisting of two main sections: first, developing the research question and objectives and designing the theoretical framework; secondly, designing the research methodology including the research approach, methods, instruments or information gathering guidelines, and method of results analysis. The first section will include developing the rationale for the research question and objectives, as well as a theoretical framework that will identify theories and concepts from relevant disciplines, and any relevant philosophical foundations or concepts, that is coherent and appropriate to the research question and will form part of the final thesis proposal. This section also includes a critical understanding of the general range of disciplinary and interdisciplinary approaches to the students' research topics, as well as an understanding of knowledge transfer and situating their research topic in national and international research and intellectual traditions.</p> <p>The second section focuses on the selection and development of a methodology consistent with the theoretical framework including the approach, methods, instruments or information gathering guides, and guidelines for conduct of the study including a draft ethics proposal. The module will also discuss the development of theoretical sections of a thesis</p>

	in addition to empirical research designs, and the implications of their research for professional practice. The module will conclude with a draft of a detailed research proposal for their thesis. Where relevant, students may conduct a pilot study.
--	--

Business Law Core Modules (Mandatory – All to be taken)

LAW601 International Business Law	This module aims at providing a thorough and advanced knowledge of the basic methods of doing <i>business</i> abroad: the sales of goods (export) <i>transactions</i> , licensing and franchising, international joint ventures and varying types of payment options. The aim of the module is to develop and advance the students' understanding of key aspects of commercial law, including how cross-border sales contract are created, what rights the parties enjoy and what kind of liabilities such contracts may give rise to domestically as well as under international law. The module will critically consider current issues in the law and practice of international business. This includes the shortcomings in regulation of international trade finance, international marketing operations, countertrade, mergers and acquisitions. Topics to be covered include: Sources of international commercial sales: English law and SOGA 1979, Incoterms, CIF and FOB contracts, 1980 Vienna Convention on International sale of goods, creation of the contract: incorporation of standard terms and transport obligations, transfer of risk and property, international joint ventures, internal and external relationship, commercial agency, assignment, international franchising and agencies abroad, regulation of international trade finance, international marketing operations; counter-trade; mergers and acquisitions.
LAW602 International Investment Law	The aim of the module is to develop a critical understanding of current and emerging developments in international investment law. The module will equip the students with the knowledge and understanding about the various approaches to regulating foreign investment in a social, economic and political context. Topics to be covered include: sources of international investment law, the evolution of international investment law, theories relating to foreign investment, the regulation of foreign investment, the standards of protection under modern bilateral/multilateral investment treaties (BIT/MITs) and investor-state arbitration.
LAW603 Commercial Arbitration and Dispute Resolution	The module introduces the student to the law and practice of commercial arbitration, mediation, adjudication and other alternative dispute resolutions. The aim of the module is to develop a critical understanding of the evolving complex practical issues of international commercial arbitration, in the context of both investment relationships between states and foreign investors as well as those between parties to normal commercial contracts, faced by lawyers as counsel to the parties and as arbitrators; and to equip them with the necessary skills on how to handle such issues. Topics to be covered include: Arbitration Agreement, Arbitration Tribunal, Applicable Laws, Procedure and Evidence issues, Arbitration award, enforcement and recourse against

	awards, mediation, adjudication and other alternative dispute resolution. The module will be taught comparatively with reference to various international laws, the Arbitration Rules of UNCITRAL, the rules of leading arbitration institutions (e.g. AAA, ICC, LCIA, ICSID) and the major international instruments relevant to international arbitration.
LAW604 Intellectual Property Law	This module is designed to provide advanced knowledge and higher level understanding of the law and practice relating to intellectual property rights. Intellectual property plays a vital role in the global economy. However, as the scope of protection expands to cover new subject matters, the protection of intellectual property also raises serious ethical and societal value issues such as the propertisation of genes and other biotechnological products under patent law. Topics to be covered include: the international patent system – the Paris Convention and the World Intellectual Property Organisation (WIPO); comparative patent law systems; the patent provisions of the TRIPS Agreement, patents and access to medicine.

Duration of the Programme

Mode of Study	Minimum Period of Study	Maximum Period of Study
Full time	Three years	Five years
Part time	Four years	Seven years

Transferable Skills (Non-credit)

During the programme students are expected to successfully complete a number of hours of training through special sessions to develop competence and skills in targeted areas relevant to scholarly activity and business law practice as discussed with your Director of Studies.

The Thesis (360 credit hours)

This element comprises the planning, development and submission of a doctoral research thesis of 60,000 – 80,000 words. This will draw on a major research investigation that you have carried out. It requires individual work under the supervision of a Director of Studies and second supervisor and critical feedback and oversight from an academic advisor. The PhD thesis will be expected to make a distinct and original contribution to the knowledge of the topic addressed.

Study at the doctoral level consists of a mixture of investigation, enquiry, interpretation and critique, presented in the taught modules, into the latest research findings within an area combined with the ability to criticise and extend

this knowledge, leading to a major piece of independent research. Please refer to the Assessment Section below to see how these skills and abilities are distributed across the assessment criteria.

The following diagrams represent the stages of the programme students must successfully complete in order to be eligible for the award of PhD. There are two tracks of study one can undertake: Full-Time and Part-Time.

Table 1: Full-Time PhD in Business Law Structure over 3 Years

	TERM 1	TERM 2	TERM 3
YEAR 1	Subject study 1 (20 credits)	Qualitative research methods and paradigms (30 credits)	Legal Research Methods
STAGE 1	Subject study 2 (20 credits)		Subject study 3 (20 credits)
YEAR 2	Research Design and Plan Development (40 credits)		Proposal submission and defense
YEAR 3	Thesis Work		

KEY	Taught modules	Supervised independent research
-----	----------------	---------------------------------

Final viva voce examination

Table 2: Part-Time PhD in Business Law Structure over 4 Years

	TERM 1	TERM 2	TERM 3
YEAR 1 STAGE 1	Subject study 1 (20 credits) Subject study 2 (20 credits)	Qualitative research methods and paradigms Subject study 3 (20 credits)	Legal Research Methods (30 credits) Subject study 4 (20 credits)
YEAR 2	Research Design and Plan Development		STAGE 2 Proposal submission and defense
YEAR 3 STAGE 3	Thesis Work		
YEAR 4 STAGE 3	Thesis Work		

KEY	Taught modules	Supervised independent research
-----	----------------	---------------------------------

Final viva voce examination

7 Progression through the Degree

Each student will prepare an Individual Study Plan with the allocated Subject Assessment Tutor (SAT). This Plan will be monitored and revised if necessary each term. Students have the option of taking one or two modules per term, depending upon individual circumstances and supervision capacity.

There will be regular meetings with your Director of Studies, Second Supervisor and Academic Advisor throughout the programme. A full schedule of the expected meetings, the participants and outcomes are in Appendix 1.

All meetings with the Director of Studies and Second Supervisor must be documented by students in a Student Log which forms an important source of evidence for the Board of Examiners.

Students must pass all taught modules successfully, according to the grading criteria defined in the Assessment Criteria Section below. Having passed all of the taught modules, students must also successfully pass the Proposal Defense before progression to the research element is permitted.

Although the normal period of study for full-time students is 3 years and for part-time students is 4 years, students may have a further period to submit their thesis if approval is granted after a formal request to the Board of Examiners for an extension of time. Any such requests must have the support of the Director of Studies and must include details of why the extension is being requested, together with an agreed plan and timetable for the remaining work.

Students interrupting their studies must obtain Faculty approval to do so which will include agreement on the arrangements for return to study.

Students whose circumstances mean they will miss classes or submission due dates or reduce their performance significantly should immediately complete a Mitigating Circumstances form with as much detail as possible and documented evidence where available. This will be considered by the Board of Examiners.

8 Expected Workload

Module hours vary depending upon the credit value. Please consult the module descriptors for a breakdown. Typically, a 20-credit module consist of 36 hours for classroom seminars and lectures, plus additional hours for group/meeting work and tutorial study. As a rough estimate, at the graduate level there should be 3 hours of private study for each hour of classroom and tutorial time. Module work includes the following:

- Reading for sessions and assignments
- Preparation of work for sessions (e.g. presentations)
- Face-to-face teaching in lecture and seminar formats
- Post-session follow-up work
- Online discussion with the tutor
- Preparation and research for assignments
- Writing up of assignments
- Group/ meeting work
- Other

Following the initial meeting on entry to the programme, supervisory meetings will be held with the student each term. End of term review reports will be completed by the student and SAT or Director of Studies which will be made available to the Dean of the Faculty, Head of Programme, the Board of Examiners and the Director of Studies. Throughout the programme, each student is required to maintain a Student Log. This should record your ongoing evaluation of the contribution to learning and research direction from your modules, notes from your supervisory meetings and general progress notes on your research experience, proposal and, later on, the thesis.

9. Attendance Requirements and Other Module Policies

A minimum of 70% attendance in modules is required. The details of attendance policies and related procedures are listed in the BUiD Student Handbook. It is important that you familiarise yourself with the Handbook – please browse through it so that you know what range of policies are included.

10. Residency Requirements

The residency requirements for full-time students are to remain in the UAE throughout the programme in order to allow for attendance at modules and face-to-face supervision and tutorial support. Part-time students should be resident for the full period of modules taken. Additional information is in the BUiD Student Handbook.

11. Assessment

11.1 Criteria of Assessment and Grades

All assignments and work on both the taught elements and in the thesis are assessed using the same criteria appropriate to the doctoral level.

Table 3: Assessment Criteria

<p><u>Knowledge and Understanding</u></p> <p>1. Identification of key issues and recognition of leading edge ideas</p> <p>Wide range of background reading including classic and contemporary sources; explicit identification of theoretical foundations; explicit identification of significant themes and of areas of dissonance between studies/authors/domains within the overall field.</p> <p>2. Awareness of a variety of standpoints</p> <p>Attention drawn to the level of consistency evident within the accounts of leading authors/researchers/commentators; attention drawn to the chronology of ideas and practices; challenges to prevailing views highlighted.</p>
<p><u>Application, Argument & Analysis</u></p> <p>3. Extension and application of theoretical knowledge to generate new understandings</p> <p>Integration and synthesis of accounts of published authors; extrapolation from theory to generate further hypotheses; attention to the ways in which theoretical arguments and/or research findings have been or could be used to inform practice and make an original contribution to knowledge.</p> <p>4. Critical analysis of the sources or evidence bases</p> <p>Depth of background reading with attention to genre and epistemological assumptions; independent critical evaluation of the reliability of 'evidence'; independent critical evaluation of the validity of claims made; quality of evidence to support claims; attention to features of research and design methodology.</p>
<p><u>Communication & presentation</u></p> <p>5. Suitability and/or potential for dissemination / publication</p> <p>Purpose, audience, message, quality of presentation and communication; overall coherence and attention to detail.</p>

Although your final transcript will show only PASS or FAIL, the University may provide information grades and/or percentage values for feedback purposes.

11.2 Assignment FAQ

What is the purpose of the assignments? All modules in the programme have written assignments. Some modules also have an examination – see individual module descriptors. The assignments have three functions: to help in the development of critical and compositional skills necessary to the thesis; attaining a critical understanding of the module content at the doctoral level; and provide an opportunity to examine topics that you may wish to research in the thesis.

What can I expect from my module instructor? You will be provided with guidelines on the assignment. This will include help in the development of topics for module assignments. However, module instructors are not expected to supply the ideas for assignments.

Can I expect a tutor to read a draft? Yes, the instructor can read one draft of each assignment, however, drafts need to be given sufficiently ahead of the assignment due dates allowing for comments and guidance that can be used in redrafting. You should allow at least 4 days for the tutor to look at and comment on your draft. No drafts should be given to the tutor later than 10 days before the due date for the assignment. Full details will be provided by the module instructors.

Can I get my language checked? The Doctoral Training Centre is available to assist with compositional aspects of papers, however, the staff require sufficient time to do this. Please review the Doctoral Training Centre's policies and requirements on Blackboard.

What feedback can I expect on my work? Once the work is graded, and a provisional grade is released, you will receive written feedback from the module instructor in about three weeks' time on the quality of the work and suggestions, where necessary, on how your work can be improved. The final result will not be released until after the Board of Examiners meeting usually held about 6 weeks after the end of the term.

12. The Thesis

The thesis is the major element of your programme. It will be between 60,000 and 80,000 words; the focus will be on the quality rather than quantity.

The following are the stages to be undertaken:

- A formal proposal together with an oral defense will form the progression to the thesis stage of the PhD.
- A plan or timetable - indicating how the work is going to be undertaken and flagging deadlines and critical points when the advisory team and student should meet. While the details of the plan will vary, it is of paramount importance in all cases that draft chapters be submitted to the advisory team in enough time for feedback to be provided.
- Regular tutorials will be scheduled with your supervisor(s) for you to discuss the progress of your research, including the gathering of data and to review the writing up of different sections of the thesis.
- At an appropriate point in the last year of study, the supervisory team will meet to discuss the suitability of the work for submission to examination.

- Any thesis submitted must conform to the University's agreed standards for PhD theses.
- Once submitted the thesis will be examined by one internal examiner and one external examiner.
- Following initial consideration of the thesis the student will be required to attend a viva voce examination during which they will be expected to present and defend their research, as detailed in the thesis.
- Following the viva voce examination, the examiners, via a joint written report to the Board of Examiners, will make one of 5 recommendations, ranging from satisfying the degree requirements, without or with amendments, to failing.
- Following a recommendation from the examiners that the PhD should be awarded, the University will confirm eligibility for the award following submission of two final, hard bound, copies of the thesis to the University and following the settlement of any debts to the University.

13. Who to go to for help

Head of Programme

The Head of Programme has the ultimate responsibility for programme monitoring, development and review. Any notices concerning the overall programme will be posted on Blackboard or conveyed to individuals by the Faculty Administrator through email.

Student Academic Tutor (SAT)

Students are assigned a SAT from within the faculty. The SAT selection will be based on student topic of research keeping in mind that the SAT is most likely going to end up becoming the student's DoS. This selection process will be completed at the start of the programme. The SAT takes full responsibility for the overall management and direction of the student's academic matters during the taught stage of the programme, with the exception of the proposal writing module (Research Design and Planning – RES 606B), in addition to administrative issues relating to the registration and progress.

Director of Studies (DoS)

The DoS assumes full responsibility for the overall management and direction of the student's research programme from the start of the proposal-writing module (Research Planning and Design module – RES606B). The DoS performs the main supervisory role for a doctoral student and will meet regularly with the student and advise on academic progress. Duringg this period the DoS will also deal with any administrative issues relating to the student's registration and progress. The DoS will normally be from the faculty to which the programme belongs and have had previous experience of successful doctoral supervision. If the student has any difficulties that they would prefer to discuss with someone other than their DoS, they can approach the Head of Programme.

Second Supervisor (SS)

A SS will be appointed for every student. A Second Supervisor will be drawn from the staff of BUiD and will normally contribute specific expertise in assisting the DoS throughout the development of the student's research programme and may act as a supervisor of sections of work in progress in consultation with the DoS.

Module Coordinators/Instructors

Module Coordinators or Instructors are responsible for all aspects of a module, and may at times co-teach or collaborate on parts of a module with another faculty member.

14. Communications with BUiD

You will be registered with Blackboard which is a learning platform that can be accessed from the Internet. You will be registered on:

1. The modules you are actually following at any point, and also
2. On the Doctor of Philosophy Business Law site.

You should check both. Any new announcements will appear on the general screen when you open Blackboard. You will also be assigned a BUiD email address, and will be added to a PhD mailing list for additional information outside of module material, such as library news, request for information, organizing events, etc.

Each module instructor will post information about modules (schedule, weekly tasks, assessment guidelines etc.) for student access. Blackboard will also be used to send out emails to the BUiD email address.

15. Library and Access to e-resources

All students will have the right to borrow 10 books at a time. These books are on loan for specified periods but can be renewed on-line. Books already on loan can also be reserved. For general loan policies see the General Student Handbook.

If you need the library to purchase books relevant to your research topic, contact the Programme Coordinator with the relevant information.

Access to full-text journal articles is available through the BUiD's e-resources which can be accessed off-campus as well.

16 Board of Studies and Programme Evaluation

The programme is governed by a Board of Studies (as are all programmes in BUiD). The Board of Studies consists of all the BUiD staff who teach in the programme, faculty adjunct to the programme who may serve as DoS or second supervisor, a faculty member external to Business, and student representatives. It meets twice a year, discussing all elements of the programme. It is the forum for discussion of any common issues which either the students or Faculty wish to raise. Each cohort of students elects representatives who report to the Board on issues that have been raised with your representatives.

We are very interested in hearing your ideas about the programme and there will be opportunities for you to raise issues concerning your modules through student evaluations at the end of each module. There will also be opportunities for you to discuss collectively issues concerning the programme as a whole in the Academic Staff Student Liaison Committee (ASSLC) which is usually conducted via a group evaluation session.

17. Members of Academic Staff

Profiles and curricula vitae are available for all BUiD faculty members on the BUiD website through links from the “People” page.

Appendices

Appendix 1: Mandatory Meetings Timetable

Table 4: Timetable Showing Mandatory Meetings with Candidates and Outcomes

	Formal meetings	Those present	Reporting to	Outcomes
Years 1 & 2 or until successful proposal defence	<p><i>Initial meeting</i></p> <p>To introduce supervisory team, and agree the full taught study plan.</p>	<p>SAT (year 1)</p> <p>DoS + Second Supervisor (year 2)</p>	<p>Faculty Administrator who in turn reports to Head of Programme, Dean and Board of Examiners</p>	<p>DoS and supervisory team and full programme module plan established and recorded by Faculty Administrator</p>
	<p><i>Regular meetings</i></p> <p>Once or twice a month with DoS and/or Second Supervisor to discuss progress during terms.</p>	<p>SAT and Faculty Academics</p>		<p>Meeting outcomes recorded by student in Student Log in consultation with DoS</p>
	<p><i>End of term meetings</i></p> <p>End of Term progress meeting with DoS and Second Supervisor to discuss Student Log and end of term progress evaluation forms and report from the Academic Advisor (if any)</p>	<p>DoS and Second Supervisor</p>	<p>Head of Programme, Dean</p>	<p>Completed progress forms go to Faculty Administrator who circulates them to Head of Programme and Dean. Taught module results, outcomes from evaluation forms and copies of any Academic Advisor reports submitted to BoE</p>
	<p><i>End of year meeting</i></p> <p>End of year progress meeting with DoS, Second Supervisor and Academic Advisor to discuss Student Log and end of year progress evaluation forms and report from the Academic Advisor.</p>	<p>DoS and Second Supervisor</p>	<p>Head of Programme, Dean, Board of Examiners</p>	<p>Completed annual progress forms go to Faculty Administrator who circulates them to Head of Programme and Dean. Taught module results, outcomes from annual evaluation forms and copies of any Academic Advisor reports submitted to BoE</p>

	Formal meetings	Those present	Reporting to	Outcomes
Proposal defence	<i>End of taught stage</i> Oral examination to proceed to thesis stage.	DoS and Second Supervisor	Head of Programme, Dean, Board of Examiners RDC	Examination result reported to Board of Examiners and RDC
All subsequent years following successful proposal defence	<i>Regular meetings</i> Regular meetings once or twice a month with DoS and/or Second Supervisor to discuss progress	DoS and/or Second Supervisor		Progress status update reported to BoE each term and recorded in BoE minutes
	<i>End of year meetings</i> End of year annual progress meeting with DoS, and Second Supervisor to discuss progress and advise whether thesis is ready to be presented and arrangements for examination	DoS, and Second Supervisor	Head of Programme, Dean, Board of Examiners	Annual progress report and decisions about continuation submitted to Board of Examiners. If appropriate, plans for submission, examination arrangements, including external examiner arrangements, submitted for agreement.
Final examination	<i>Viva Voce</i> Oral examination to qualify for the award of PhD	One internal examiner (from BUiD) One external examiner	Head of Programme, Dean, Board of Examiners	Result reported to BoE

All meetings with supervisors will be documented by students in the Student Log and will form the core of the progress reports submitted to the Board of examiners. The Board of Examiners will meet at least twice per annum.

Appendix 2: Extension Guidelines

The Faculty of Business and Law operate the following policy as regards extensions/late submissions.

1. The Mitigating circumstances procedure (see General Student Handbook, Section 4.10) will be used for short-term lateness (up to 5 working days) which could not be foreseen.

2. However, an extension procedure will be used to grant longer term extensions which can be foreseen further in advance.
3. Such negotiated extensions should first be discussed with the Module coordinator for whom the work is going to be presented. If the Module tutor is in agreement, then the student should write formally to the Dean explaining the reasons for the request who will formally grant the extension. Evidence should be provided where possible.
4. Each case should be considered on its merits and below are examples of acceptable/unacceptable circumstances.

Acceptable	Unacceptable
Major computer problems (e.g. failure of university IT systems, such as network or server failure) Significant medical problems Personal problems Compassionate, (for example, family bereavement)	Minor Computer problems (e.g. lost or damaged disks, printer breakdown) Lost assignments Desired books not in library Unverifiable travel difficulties Not realising deadline imminent

Such extensions will not normally be granted for overwork, but special circumstances should be considered: Special consideration will be given to students who have had to re-submit earlier assignments.

Late submissions will be noted on your student progress reports and communicated to the Board of Examiners who will recommend whether or not you should continue.

Appendix 3: Useful information

Referencing Guide

In your academic writing you will be using information from a variety of sources, mostly books, journals, and websites, but also lectures, handouts, official documents, magazines and possibly emails and unpublished dissertations and theses. All these sources from which you have gathered information and ideas must be acknowledged, both in the text and at the end of your essay or dissertation in a reference or bibliography. Certain conventions are used in writing bibliographies and references (including the Oxford Standard for Citation of Legal Authorities (OSCOLA), Harvard Referencing System, APA, and MLA) – the style guide required in Business Law is OSCOLA. There are some differences between them. For example, the Harvard System does not use footnotes but incorporates the information into the main text using direct or indirect quotations. However, the underlying principle is the same for all systems. You must name your sources. Not doing so is plagiarism. It is stealing someone else's work and ideas and therefore dishonest. If you have any doubts about what to do, it is always better to provide a reference.

The Doctoral Training Centre within the British University in Dubai provides support in the form of Referencing workshops.

General points to remember

1. the authors in a reference or bibliography must be listed in alphabetical order by their surname
2. titles such as Dr. and Prof. are not used
3. all sources must be acknowledged
4. underlining or italics is used for the name of a book or journal
5. the year of publication is required, not the date the book was reprinted
6. a reference lists the sources we used, whereas a bibliography includes sources we read but did not use. Sometimes both are required. Find out from your dissertation supervisor.
7. the information you need from a book will usually be found on the first page inside the cover
8. if you use an author's ideas or words you found in another book, in your text you write both names, but in the reference you only write the details of the second book (the secondary source).

Study Skills

Writing a bibliography or reference can be a tedious process. Make sure to attend the relevant study skill workshop provided by the Doctoral Training Centre. To make it easier make sure you remember to use the following study skills:

1. note the details of the book, article or journal you are reading before you return it to your lecturer or the library
2. note the details of a useful website before you leave it
3. when you make notes for an assignment take down the details of the book you are reading including the page numbers
4. clearly date your notes from lectures, adding the name of the lecturer
5. note the details of books, articles or journals you make photocopies from

6. consult your department and follow the guidelines they require
7. use templates provided if available
8. build your reference or bibliography as you write your assignment
